

# 7TH INTERNATIONAL CONFERENCE ON SMART AND SUSTAINABLE TECHNOLOGIES

Bol and Split, Croatia (hybrid)  
5-8, July 2022

## Special session within the International Symposium on Advances in RFID Technology and Electromagnetics for IoT

### Fusing RFID - Combining RFID with other technologies

#### Organizers:

**Johanna Virkki** (Tampere University, Finland)

**Mirka Leino** (Satakunta University of Applied  
Sciences, Finland)

**Sari Merilampi** (Satakunta University of Applied  
Sciences, Finland)

#### Call for Papers:

The continuous advances in RFID technologies and other wireless technologies are pushing our society towards a new paradigm that includes Internet of Things (IoT) and Internet of Everything (IoE), and that is having a strong impact on our everyday lives.

This change requires wireless, low-cost, and low-energy devices, which can be displaced around cities, inside houses, on clothes and on personal items, and generally on every object, making the whole world connected.

While RFID is one of the key enablers of this change, even more can be achieved together with other technologies. Authors are now invited to submit recent advances in RFID fusion, which means connecting RFID technologies to other technologies, such as other wireless technologies, VR/AR, robotics, and sensors.

### **Important Dates**

Paper Submission: **March 10, 2022**

Notification of acceptance: **May 1, 2022**

Camera Ready Papers due: **May 20, 2022**

Conference: **July 5-8, 2022**
